

Number Patterns Part 1

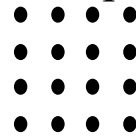

Look over the following sequence of numbers and pictures.

The second “square number” is 4. Call it S_2 .

The third square number, S_3 , is 9.

The fourth square number, S_4 , is 16.

(a) What is the fifth square number? The tenth? How did you find them?

(b) How would you define the first square number, S_1 ? Why?

(c) The number 196 is a square number. Which one?
